“Prepares a student to fly out & accomplish their mission in life”

Overview

We welcome you with open mind we welcome you with open arms we welcome you with kindness because we know who are you. You are our guest but for a little movement and next you will be our closest friend ever. We will celebrate together we dance together and enjoy with the with the happiness of togetherness. Shri G- International, a co-educational English Medium school, with ICSE Affiliation endeavors knowledge not only in the curricular but also co-curricular activities and also excelling a child so that he or she never has to compromise with their future.

Vision

To serve the students by imparting quality and holistic education, synergizing their individualistic potentials with academic excellence and developing them into socially, ethically & morally responsible citizen of tomorrow. The Methodology is unique and stands out on the strength of its core beliefs, values and approach

“A child believe anything is possible, we believe they should never stop thinking that way”

The Intelli – Genext Kids

Are you afraid about your child?

Don't be worry about that they will be fine because they are here in SHRI - G INTERNATIONAL. We are provide best. Our intelli – fresh staff provides activities and enjoyfull games. Our infrastraction describe the quality and quantity of knowledge we have.

Not only this, we make learn that fear is just an imagination you have but happiness is a true content life has. and even we have some dynamic activities which our friendly teachers provides and as an outcomes our children be ready for life challenges and globally known person and receive the ownering word like – the great or the one who never die .

Motto

We at Shri G, think of education as the means of developing our greatest abilities because in each one of us there is a hope & dream so here we motivate the individual to convert their dreams into reality.

We want the child should excel in every field & so we focus on Total Quality Management & believe that “ 10 times learning is equal to 1 time watching.Until a child is not familiar with the topic, he or she will never be able to understand it. We are working today for creating future globalists.

Education is not just about the subjects that we learnt & taught in school. Becoming educated is not restricted to being in school or gathering certificates. It is a lifelong exercise that can be unbelievably exciting if only we wish to jump onto the train of experience. We all are on the same page : children , teachers & parents have to understand that education is not restricted to lessons taught in the classrooms from text books. The thirst for knowledge is not restricted to the child but it is also essential for a parent & a teacher to keep on adding to their own knowledge by keeping their eyes & ears open.

Thinker...Innovator...Leader...

Education

Education for us is to kindle & nurture in each student the curiosity to exposure, experiment and learn. Technological advancement today has augmented the nature & extend of exposure for our children .It forces them to deal with a far more challenging, demanding & competitive environment than we ever faced.

Therefore for us education is not only knowledge acquired from books but to impart skill sets by providing an engaging and enriching curriculum and also by inducting multi-dimensional activities that enhance the student's intellectual and physical agility to adapt in diverse environment. We encourage and guide the child to balance & face the success and failure with courage and determination.

The effort is to create dedicated & engaged learners who become creative fountainheads with expert mentoring from caring teachers and educators in partnership with supportive parents. Children are our assets and we have a liability of rendering knowledge sincerity and achieving ability to our students.

Library

A library is not just a place but a source to impart knowledge & a place where the divine curiosity of students is at work. The library contains a well-defined set of approx. 2500 books including story books, fiction, novels, biographies, encyclopedia & an exhaustive reference section to expose the students to a world of exposure, students to a world of imagination & fascinating facts especially arranged keeping in mind the need of students. The school library regularly subscribes to various periodicals, journals & newspapers.

TODAY'S LEARNER, TOMORROW'S LEADER

Infrastructure

The state of art infrastructure is a reflection of the vision of the school. It is a result of meticulous planning and is created to fulfill the promise of creating a nurturing environment.

- 3) Multipurpose Auditorium
- 4) Activity Rooms for Dance, Art, Music & Drama.
- 5) Toddler's Playrea
- 6) Jungle safari
- 7) Desert S afari
- 8) Open air theater
- 9) Amphitheater
- 10) Indoor /Outdoor Sports Courts

Rattafication is banned

Rattafication is banned because it is like polythens as polythens harm environment and rattafication harms minds. study is for study but tech is for everyone .so lets begin with tech and ends with top of the world.

Practical education

We are not giving education to the children in class only. We are providing them education practically. We are providing new methods to understand the things which they are studying . We take children to computer and science labs and performing practical activities so that students understands more about their topics.

Latest technology

We are giving the children the power pack sessions so, that students are updated and having the knowledge to answers any questions. Students can have their Role Model by the videos delivered by us .students inspire from famous personalities and there struggle to work hard. In power packs student can improve their English skills, by watching English videos. We are taking exams like power point presentation (PPT), listening, understanding, explaining (LUE) , Case study etc. We are providing international language hat is French.

Smart Interactive Classes

To make the learning process more easily we have include Interactive Classes in our curriculum so that children learn more precisely and properly. These are enjoyable teaching techniques especially designed by highly trained and well known world class professionals. Our school not only teaches them to understand these topics but also to explain them to encourage and motivate themselves for their total development which is the basic aim of the school.

Breath English

English is just a language but it can even change wondirs .we always ready a child to be globally know step towards this advantages of enhances decision making ,enhances the ability to multi task etc.and that,s what we want as our outcome.we starts with negative and turn it into positive.we never used to have right decisions but we turn decisions into right.

“You can teach a student a lesson for a day; but if can teach him to learn by creating curiosity; they will continue to learn & understand everything”

Sand Pit

The Tiny Tods enjoy at the Sand pits with swings , slides & not only enjoyment but it also develops the Fine Motor Skills in children by allowing them t make a castle or small things out f mud.

Sports

“A healthy body lives in a healthy mind.”There are numerous facilities available for sports. The professionals train the students & further the students are given an opportunity to nurture their talent. Efforts to deliver competition grade sporting are being encouraged here. Awareness about health is also a key subject that is extensively dwelt upon on a regular basis.

Pickel bal

“Empowering Education: For better Tomorrow”

Academics

Shri G believes in imparting an educational experience i.e. World class in every respect and which prepares children for global citizenship. We are a school with an Indian soul & mind. Here the curriculum we follow focuses on all directions.

Kindergarten Programme

If children are motivated during the formative years of learning to think beyond what they are taught, they discover a new dimension of learning. In Shri G the curriculum aims to explore interests, promote creativity, curiosity, determination & independence among children. The main objective at this level is to facilitate students to express themselves through a wide range of performing & visual art activities.

Middle School Programme

It is structured to meet children’s varied intellectual and development needs. The programme aims at developing skills related to writing, reflecting, critical thinking, public speaking, fostering initiative among students and a desire to acquire knowledge.

Projects showcase the knowledge and skills acquired by students in various subjects, and serves as a concrete step towards developing inter disciplinary approaches in later years. Field trips and excursions aid in developing social skills and in raising awareness about the world.

Primary Programme

The school focuses on learning of basic academic skills & concepts in various subjects. Apart from the scholastic programme, a well-structured programme is developed to promote artistic, linguistic, health, wellness & emotional development of students. Art, drama & public speaking are important components of the programme.

The core subjects are emphasized & the curriculum is enriched with a Trans disciplinary process that prepares young students to be self-confident. The wide range of curricular & co-curricular opportunities offered helps instill in children confidence & discipline. Field trips, projects and presentations provide experimental learning opportunities.

“Listening is an Art.”

To make a student creative & innovative we inculcate other things as a part of learning.

LUE

We all know that we learn something only when we listen it. So LUE Stands for this only

Everyone can be good speaker but to be good listener demands patience, curiosity and a peaceful mind. In Shri G we work on it by showing students videos or make them listen an audio & then ask the students to explain what they have understood in their own words. Through this activity we target on student’s grasping power & critical thinking to explain the topic in their own words. As we all know any competitive exams like IELTS etc work on five modules i.e. Listening, Reading, Writing, Speaking & Understanding. This activity helps the student to enhance their personality and them outspoken.

RCE

“You can teach a student a lesson for a day; but if can teach him to learn by creating curiosity; they will continue to learn & understand everything” So here in Shri G we follow the same concept.

RCE stands for Ranchhod Das Chanchad Examination i.e. the practical learning. The name was inspired by the movie 3 Idiots in which Aamir Khan played the role of innovator and showed the different concepts of education life & make people understand that learning can be done by its best only by doing it practically .In this we don’t force the student to learn the things given in book instead taught the way which they find easy & understand. Generally Education System focuses on theory but in this program students learn things by doing it practically. This is conducted from primary to higher sections and the activities are to be done according to their syllabus. RCE gives a student a better vision to understand the word in a different perspective.

“We make Entrepreneurs from the very Beginning”

Business Plan

Shri G wants to make the students be the Leaders not the Followers & even in this competitive World every parent has a Dream that their children should established themselves successfully in their life. Shri G took initiative to make entrepreneurs not the workers so under this concept every child is encouraged to make his own business plan which help them to understand all the skills needed to start the business & when they present it in front of everyone in school they became confident & learn the Presentation Skills.

Public Exposure

The children are given Public Exposures in terms of Guest Lectures, Field trips, Night Outs, Junior RJ etc. It brings in Confidence, Leadership quality, develops Listening, Reading and Writing skills, Speech effectiveness, fluency and developed vocabulary.

Knowledge Sharing Sessions: The teachings of our school are spreading colors in the world but we do not stop to rest at any part of our life. We work harder to make our children’s compete with the World. We invite world known top level lecturers to impart extra knowledge about different fields which is very beneficial for students. Our children get knowledge regarding various topics with the help of technologies like video conferencing.

“Inspirations make us fly high”

Power Packed Sessions

We run a fully fleshed session in our school which aims at the activities which are other than curricular ones. In this we work on basic concepts, building their confidence & able to face the crowd. We work extensively to build their inner capabilities so that they will be able to face the challenges in future. Today’s education needs to be expanded, elaborated, enhanced and enforced practically. Others see the present of your child & plan for the future but there in our school for the better future of your child we plan their present.

Role Model

Students often don’t like to listen something but they like to imitate others. We motivate the students to come in the get up of their famous Role Models and share their struggles & achievements in life. We here in Shri G believe one should always have a Role Model in life from which they can learn something from them & strive towards achieving success.

Icse Alumni
